SUMMARY

IT support professional with hands-on experience in Tier 1-2 troubleshooting, software deployment, and full-stack development. Proficient in diagnosing hardware/software issues, building and deploying web applications, and providing clear technical communication to stakeholders.

SKILLS

Languages & Frameworks: Python, JavaScript, Flask, Tkinter | **Tools:** Heroku, Git, pynput, Chart.js | **IT:** Tier 1-2 Support, Incident Response, Documentation, Remote Troubleshooting

PROJECTS

Keystroke Tracker | Python, Flask, JavaScript, Tkinter, Heroku | [Live App](#)

- Engineered a full-stack web app and desktop client to track and visualize keystroke activity in real time, deployed to Heroku with multi-user session support.
 - Architected a REST API with Flask serving live stats, session history, and key frequency data to a Chart.js frontend.
 - Implemented system-wide keystroke capture on the desktop client using pynput, syncing each keypress to the server via a non-blocking background thread.
 - Diagnosed and resolved production bugs including timezone serialization errors and thread-safety issues between the pynput listener and Tkinter UI.
-

WORK HISTORY

Consultant - Product Support

Wiley Edge | 09/2021 - 04/2023

- Bridged communication between clients and engineering teams to resolve software issues, cutting response time by 30%.
- Authored and maintained product documentation and issue logs, achieving 100% accuracy across all tracked updates.
- Coordinated cross-functional teams to streamline daily operations and consistently meet product release deadlines.

Laptop Maintenance Support - Volunteer

MEDA (Mission Economic Development Agency) | 04/2025 - 09/2025

- Restored and maintained laptops for community public use, improving device performance and security for digital access programs.
 - Applied software updates and security patches to ensure full device compliance and usability.
-
